

## Hortilux HS 2000

**Assimilation lamp 'Hortilux HS2000'**  
**'600 watt' av. 230 volt and 400 volt**

**Item-number: 1.HHS2000.914.0**

The HS2000 is a conventional fixture with a slim housing and two compartments. The slim design means that more light can access the greenhouse. The aluminium housing is sturdy enough to function for years without any problems. The use of two compartments improves heat removal, keeps the complete fixture cooler and guarantees a longer component life. The bottom part of the housing can be easily removed from the upper part for ease of maintenance. All the electrical components are in this part. The reflector with its reflector clip can be removed in no time for cleaning or changing.

THESE HS 2000 ARMATURES ARE USED AND NEW AVAILBLE AT Lingeburg B.V.!
